

Three reasons to accept card payments

1. Increase sales

Accepting cards boosts sales.

Paying by card allows customers to make impulse and large purchases immediately without carrying large amounts of cash or cumbersome cheque books.

There is no more convenient way to pay.

2. Avoid the hassle of cheques & cash

With merchant services you can get paid and have your money in your account effortlessly.

By accepting cards you reduce the need to keep large amounts of cash and change on the premises, reduce the trips to the bank to make deposits and reduce dealing with cheque clearing and invalid cheques.

It is simply the easiest way to get paid.

3. Make customers happy & look professional

Customers want to pay with card. With over 3 billion Visa and Mastercard Credit and Debit cards in circulation, cards are becoming the most common way to pay.

Customers not only recognise that professional retailers will accept card payments, but also increasingly expect all merchants to be able to accept cards.

Look good, and keep customers happy.

Faster and safer than cash and coins & better than cheques – card payments are the way of today and of the future.

Which terminal is right for you?

International Banking Group Merchant Services provide a choice of terminals to suit your business needs and competitive interest rates without hidden fees and costly contracts.

With our specialised computer system, we are able to deliver reliable up time and fast processing together with local support when you need it.

Hypercom Analogue Terminal

With a lower monthly rental fee, the analogue terminals provide convenience of card payments but require connection to a fixed telephone line.

Process payments quickly and efficiently:

- Transactions are guaranteed within seconds,
- Next day payment of funds to your account for all Visa and Mastercard transactions.

Fee includes:

- Stationery including paper rolls
- Manual imprinter and sales slips
- Monthly statements
- Service calls
- Local support

Wireless Terminal

International Banking Group is offering leading edge services with the advent of wireless merchant technology.

With wireless terminals you no longer need a telephone line and can accept payments anywhere anytime – on the road, on the beach, while at sea or anywhere there is a cell phone signal.

Better customer experience

You can process payment in front of the customer which reinforces the customer experience. They pay quickly and are safe in the knowledge that their card has not left their sight and has not been exposed to potential fraud.

Lower costs for high traffic merchants

If you process a high number of transactions monthly, you can save against the costs of an analogue terminal. No line rental is required and you don't pay per call or transaction attempt. The SIM card is included in the terminal rental fee.

- Shown to have faster connection than fixed line terminals
- Processes more than 300 transactions on a fully charged battery
- Can be rented for special events or short periods
- Fee includes all services provided with the analogue terminal PLUS
 - SIM card
 - Unlimited connection for the GSM / GPRS IM card
- Ideal for outdoors

The terminals are robust with excellent heat and humidity tolerance and are ideal for merchants like water-sports operators, taxis, tour operators, retail kiosks, mobile spas and companies on the go.

Global and Group Rates

In order to ensure the most competitive pricing, International Banking Group will consider group or global rates for businesses interested in our merchant services. By combining volumes and average sales we can look to provide a lower rate across the businesses. Contact our merchant services team to find out more.

With over 3 billion credit and debit cards in circulation around the world, can you afford not to accept card payments?
